

SMA Solar UK will be presenting innovative solutions for more energy independence at Solar Energy UK 2014

Milton Keynes, September 19, 2014 – SMA Solar UK, a subsidiary of SMA Solar Technology AG, the global market leader for solar inverters, will be exhibiting (Stand D40) at Solar Energy UK 2014, from the 14th till the 16th of October 2014 at The NEC in Birmingham. With inverters manufactured at the only ISO 14064-1 verified zero carbon scope 2 manufacturing plant, SMA Solar UK will be showcasing innovative solutions for a range of PV applications. From the SMA Smart Home, a comprehensive, intelligent energy management system for private households, - through to comprehensive system solutions for commercial roof-tops and large-scale PV power plants.

Residential systems

The SMA Smart Home will highlight SMA's comprehensive system solution for intelligent energy management in the home, significantly increasing self-consumption and reducing energy costs. SMA will be launching the Storage Solution for Home Systems including the Sunny Boy Smart Energy, the wall-mounted large volume PV inverter with integrated storage system. This combination of a modern PV inverter and battery with an effective capacity of 2 kWh makes easy use of home-generated solar power possible virtually around the clock. Also targeted to home systems, SMA's micro inverter Sunny Boy 240 will be featured along with a preview of the new Sunny Boy 1.5-2.5 for lower power classes, which will be available in 2015. The residential corner will be complimented by SMA's service offering and integrated monitoring solutions available to end users to secure plant efficiency. Here you can find out more about Sunny Places the new community portal for residential PV systems.

Commercial PV Systems

In the Commercial Solutions' corner SMA will exhibit the smaller Sunny Tripower-Generation, available up to 12 kW, as well as the new and more powerful Sunny Tripower with 20 and 25 kW expanded power classes, ideal for large scale commercial plants. As part of its recent strategic partnership with Danfoss, SMA will also present the MLX 60 for commercial and industrial PV systems. The MLX 60 combines the advantages of decentralized system design with the benefits of a centralized inverter design, in a solution that brings together the best of both worlds.

PV Power Plants

In the Large-scale PV corner you can find out more about the MV Power Stations, the ideal turn-key plug & play system for PV power plants in the UK, with the highest availability and efficiency in the industry at the lowest operating cost. You can also find out more about the new SMA Utility Power System. This optimized system includes the new Sunny Central inverter with 2200 kVA and 2500 kVA, a compatible medium-voltage block

complete with switchgear and the Power Plant Controller and DC monitoring. Suitable for nearly every type of PV module now used in utility-scale plants, it is designed for outdoor use in all regions of the world.

So come along to **Stand D40** and talk to SMA's PV specialists to discover how you and your customers can benefit from and secure your PV investment.

About SMA

The SMA Group generated sales of €932.5 million in 2013 and is the global market leader for solar inverters, a key component of all PV plants. SMA offers innovative key technologies for future power supply structures. It is headquartered in Niestetal, near Kassel, Germany, and is represented in 21 countries. The Group employs more than 5,000 people worldwide. SMA's broad product portfolio includes a compatible inverter for every type of module on the market and for all plant sizes. The product range includes both inverters for grid-connected photovoltaic plants as well as off-grid and hybrid system technology. The product portfolio is supplemented by comprehensive services and operational management of utility-scale pv-plants. Since 2008, the Group's parent company, SMA Solar Technology AG, has been listed on the Prime Standard of the Frankfurt Stock Exchange (S92) and also in the TecDAX index.
